ORTON'S FAMOUS MINSTRELS.

Coming Monday evening, Sept. 30th, even in everything and in keeping with the times. The music of the bones and tambourines will awaken in the minds of many old theatre goers the memories of the early days of minstrelsy, when crowds flocked to see the "Plantation Singers" and returned home to talk of what they had seen, until the recollections had been blotted out by the wonders of the succeeding shows.

The people have grown more discriminating in the bestowal of their applause since those distant days, but they have the same liking for minstrelsy, and that act will probably be demonstrated when Gorton's minstrels appear. This is the one show of minstrelsy that has cast aside all old, worn out features, and gives to the public a pure, wholesome, up to date show, full of snap and brilliancy. New faces, new acts, new songs, dances and music.

Wait for the only great show of minstrelsy and you will get your money's worth.

Don't miss the great street parade and band concert at noon. Best in America.

SUNDAY NOTICES.

The Rev. J. E. Rollins, D. D., presiding Elder of the Dover District, will preach at the Methodist Episcopal church at the 10:30 o'clock service. Sunday school at noon. Junior League at 1:30. Union service of the Epworth League and church at 7 o'clock, to which all are cordially invited.

The third quarterly conference will be held at the presiding Elder on Monday evening at 7:30 o'clock.

ASKS TO BE REPRESENTED.

Sampson Wants Legal Representation In Schley Court.

Request Refused On Grounds He Is Not A Party To The Case.

Captain McCalla Tells Of Conversations Held With Admiral Schley.

WASHINGTON, Sept. 27.—In the Schley court of inquiry today a letter was presented by Admiral Sampson, asking permission to be represented by counsel, but the court refused to grant the request on the ground that "the court does not, at this time, regard you as a party to the case."

The principal witnesses of the day were Lieut. Hood, who commanded the dispatch boat Hawk during the Spanish war, and Capt. Bowman H. McCalla, who was in command of the Marblehead. The testimony of both dealt with the delivery of the despatches from Admiral Sampson to Commodore Schley, and both related conversations with the latter.

Captain McCalla described in detail his part in arranging a code of signals with the Cuban insurgents and his communications with them near Cienfuegos on May 24th, 1898, when it was learned definitely that Cervera was not in the harbor there. He said that Captain Chadwick, who was Admiral Sampson's chief of staff, was the only person at Key West to whom he had communicated these signal codes. He said it was a secret code, arranged by himself, and he did not wish any publicity given to it because the Cubans thereby might be betrayed. Captain McCalla told of his return to Cienfuegos on the 24th of May with the despatches of Admiral Schley and of the delivery of them on the Brooklyn. He also told Schley that when he left Key West it was reported authoritatively that the Spanish fleet was still at Santiago. Commodore Schley said he believed the squadron to be in Cienfuegos. Wit ness told Schley that he had brought arms, ammunition and dynamite for the Cuban camp and that with his consent he would find out at once whether they were in Cienfuegos. Captain McCalla then related how he had gone ashore and found the Cuban drawn up in line and had given them food and ammunition. He also found that Cervera was not in the harbor. Considering this important information he had sent it at once to Commodore Schley by the Eagle, as she was a faster boat than the Marblehead, and he followed a few hours later on the latter vessel. He reported to Schley on board the Brooklyn, confirming the fact that the fleet was not in Cienfuegos. He saw then, for the first time, the set of instructions for Commodore Schley which the latter asked him to read and later asked him what he thought he had better do. Previous to this Schley had said that he could not coal at Santiago. That the English had demonstrated that ships could not be coalled at sea. He also said that if he returned to Key West he would be court martialed. After reading the orders witness said to him: "Commodore, I think you must return to Santiago, even if you do not stay there." Shortly afterwards the admiral said: "This is a matter I shall have to decide myself. You may return to your ship."

Captain McCalla said he had told Admiral Schley he could coal ship without difficulty at Cape Haytien. When asked what had been left undone to accomplish the destruction of the Cristobol Colon on May 31st, he replied that Admiral Schley had failed to use his entire force in making the attack. Mr. Hants is quoted if this was an important omission. This question was objected to and the objection sustained by the court, which then adjourned for the day.

Mr. L. L. Hall as Hugh Ritson has a method in striking contrast with that of Mr. Hunter, who was cast for this part at the opening performances, and is certainly far more in harmony with the general tone of the performance than his predecessor.

Miss Mauds Claire Shaw is winning golden opinions as Greta

At the police station early on Friday evening there were two for drunkenness and one lo'g'er.

nings; at Washington.

CZOLGOSZ

IN TERROR.

Assassin Collapsed At The Auburn Penitentiary.

Two Burly Deputy Sheriffs Carried Him Into The Prison.

"I Am Sorry For Mrs. McKinley," He Said.

AUBURN, N. Y., Sept. 27.—Czolgosz, President McKinley's murderer, in the custody of Sheriff Caldwell of Erie county and twenty-one regular and special deputies, arrived in Auburn at 3:15 this morning. The prison is just across the road from the depot, the distance which they had to walk after alighting from the car being less than fifty yards. Awaiting the arrival of the train was a crowd of about 200 people. Either from fear of the crowd, which was not very demonstrative and made no attempt to harm the man, or from sight of the prison, Czolgosz's legs gave way and two burly deputy sheriffs were compelled to practically carry the man into the prison. Inside the gate his condition became worse, and he was dragged up the stairs and into the main hall. He was placed in a sitting posture on the bench while the handcuffs were being removed, but he fell over and moaned and groaned, evincing the most abject terror. As soon as the cuffs were unlocked the man was dragged in the principal keeper's office. As is the case of all prisoners, the officers immediately proceeded to strip him and put on a new suit of clothes. During this operation Czolgosz cried and yelled, making the prison corridors echo with evidence of his terror. The prison physician, Dr. John Girin, was summoned, and he examined the man and ordered his removal to the cell in the condemned room, which he will occupy until he is taken to the electric chair. The doctor declared that the man was suffering from fright and terror, but said he was shamming to some extent. The collapse of the murderer was a surprise to everyone. En route from Buffalo he showed no indication of breaking down. He ate heartily of sandwich and smoked cigars when not eating. He talked some and expressed his regret for his crime.

KIRKLAND D. ARMOUR DEAD.

KANSAS CITY, Sept. 27.—Kirkland D. Armour, the packer, died here this evening. Mr. Armour, suffered with Bright's disease and a weak heart and has been failing gradually for three days.

CAUSED DEATH OF THIRTEEN.

SAN ANTONIO, TEXAS, Sept. 27.—A water spout or cloud burst, near the head waters of Alameda Creek in Presidio county, Sept. 25th, caused the death of thirteen prospectors.

WEATHER INDICATIONS.

WASHINGTON, Sept. 27.—Forecast for New England: Fair warmer, Saturday; fresh southwest winds.

NAVAL VESSELS' MOVEMENTS.

The training ship *Topeka* has arrived at Port Royal, the cruiser *Atlanta* at Rio, the supply ship *Galga* at Tompkinsville and the gunnery practice ship *Amphitrite* at New London, the despatch boat *Dolphin* has sailed from Gloucester for Boston, the training ship *Buffalo* from Christiana for Kronstadt and the collier *Alexander* from Montevideo for Santa Lucia.

Catarrh

The cause exists in the blood, in what causes inflammation of the mucous membrane.

It is therefore impossible to cure the disease by local applications.

It is positively dangerous to neglect it, because it always affects the stomach and deranges the general health, and is likely to develop into consumption.

Many have been radically and permanently cured by Hood's Sarsaparilla. It cleanses the blood and has a peculiar alterative and tonic effect. H. Long, California Junction, Iowa, writes: "I had catarrh three years, lost my appetite and could not sleep. My head pained me and I felt bad all over. I took Hood's Sarsaparilla and now have a good appetite, sleep well, and have no symptoms of catarrh."

Hood's Sarsaparilla

Promises to cure and keeps the promise. It is better not to put off treatment—buy Hood's today.

KILLED IN AN EXPLOSION

SENTENCED TO DEATH.

Six Workmen In Gas Tank Blown to Atoms.

TWENTY MORE SERIOUSLY INJURED

Essex and Hudson Gas Company, Inc., Newark, Scene of the Calamity—One of the Dead Found in Passaic River, One Hundred and Fifty Feet Away.

Newark, N. J., Sept. 27.—Six men were killed and score seriously injured by an explosion yesterday after noon in the gas works of the Essex and Hudson Gas company, which is located at the corner of Front and Lombard streets.

Dead.

Otto Newman, foreman, 75 Clay street; suffocated.

William Morris, workman, East Newark.

Morris, Kirsch, workman, Norfolk street and Central avenue.

Theodore Render, workman, lived in Front street.

Albert Snyder, 313 Fourth street, Jersey City.

Nicholas Miller, home in Front street.

Injured.

Among the injured are:

Salvator Metzger, 8 Adam street; left foot broken at the ankle.

Henry Ludwig, 31 Market street; faintly injured.

Theodore Bancker, 68 Park place; badly burned about the body and face.

A. H. Stryker, engineer; hurt about the head; taken home.

Edmund Miller, 532 Bridge street; burns about face and body; will recover.

Arthur Vincent, 219 Cleveland avenue, Harrison; burned about the face and body; will recover.

Edward Benderer, mason, 13 Front street; badly burned about head.

Otto Newman, a foreman, and two workmen named Kosch and Meyers were cleaning an empty tank, when they were overcome by the fumes. It is the custom in cleaning the tanks for the workmen to work inside them for ten or fifteen minutes and then come out for air.

At the end of ten minutes when the workmen did not come out of the tank, the suspicions of the other workmen were aroused, and volunteers were called upon to go in after them.

Five men volunteered to go to the rescue. Just after they entered the tank there was an explosion. The top of the great gas receiver was blown to atoms and the bodies of six men went flying in every direction, one of them falling into the Passaic river, nearly 150 feet away.

It was at first thought at least ten men had been killed, but when courageous firemen volunteered to be lowered into the pit where the gas tank stood they could find but one body, that of a man named Miller. Five other bodies were found within a couple of hundred feet.

To add to the horror of the accident there was danger of a disastrous fire, but this was soon averted by the promptness of the fire department.

The flames were extinguished before they reached the other tanks or had done any material damage.

Prize From British Surgeons.

London, Sept. 27.—Speaking at the banquet of the Bowyers' company in London last night and referring to a touching allusion made by the chairman, Mr. Morgan, M. P., to the death of Mr. McKinley, Sir James Crichton Brown said he was confident he was expressing the unanimous opinion of the British medical profession when he declared that the surgeons who attended the late president of the United States showed the utmost skill at every stage and did everything possible to alleviate the sufferings and prolong the life of their illustrious patient. "American and British yachts may compete for victory," exclaimed Sir James, "but between American and British surgeons there is no rivalry, but only mutual respect and good will."

Shaffer Accepts Challenge.

Pittsburgh, Sept. 27.—When President Shaffer of the Amalgamated Association of Iron and Steel Workers was shown the open letter issued by President Samuel Gompers of the American Federation of Labor and John Mitchell, president of the United Mine Workers, in reply to his statement charging them with responsibility for the failure of the great steel strike, he said he would accept their challenge and was ready to submit to no investigation as to the truth of the charges.

Secretary Root Operated On.

New York, Sept. 27.—Secretary of War Root is at his home, 25 East Sixty-ninth street, suffering from abscesses. An operation was performed yesterday that gave relief, and Mr. Root is resting more easily. The secretary is not in a dangerous condition, but the abscesses are extremely painful.

Death of Millionaire Rose Grower.

New York, Sept. 27.—The death is announced of Thomas J. Shaffer, a retired New York city millionaire merchant and of late years one of the most extensive growers of roses in this country. He died at his home, Bellwood, near Madison, N. J.

Big Packing Plant.

Omaha, Neb., Sept. 27.—Agents of the Schwarzschild & Sulzberger Packing company of Kansas City announce that the concern will locate a million dollar packing plant at South Omaha in the near future.

Wreck on Southern Railway.

Columbia, S. C., Sept. 27.—A passenger train on the Southern railway ran into the rear of a freight train three miles from Columbia. Five persons were injured.

SENTENCED TO DEATH.

Czolgosz Must Die In Week of Oct. 28.

EARLIEST DATE UNDER THE LAW.

Assassin Says He Alone Committed the Crime—No One Told Him to Do It—Taken, Closely Guarded, to Auburn Prison.

Buffalo, Sept. 27.—Leon F. Czolgosz, the murderer of President McKinley, was yesterday afternoon sentenced to die in the electric chair during the week beginning Oct. 28. This is the earliest date which could be selected in accordance with law.

The police arrangements at the city hall were even more stringent than during the trial. All sorts of excuses were given by those anxious to gain admission to the room, and half an hour before the time announced for the opening of the court the place was filled and the doors were locked. After half past 3 no one but officials connected with the court or newspaper men was allowed to enter. About twenty-five minutes to 2 o'clock District Attorney Penney and assistants entered the courtroom. He was accompanied by several distinguished guests who sat with him at his desk.

At five minutes to 2 o'clock the prisoner was brought into court shackled to Detectives Geary and Solomon, accompanied by Assistant Superintendent Cusack and Jailer Mitchell. The crowd sought to surge about them, and it was with difficulty that tipstaffs cleared a channel down the aisle to the prisoner's seat.

Nervous, but Steady.

Czolgosz was perspiring. He seemed a bit nervous, though he did not tremble, and his gait was steady. He took his seat and mopped his brow with his handkerchief when he settled back into his chair. His wretched attitude was absent. He kept his eyes wide open and looked about him occasionally, but presently he dropped his eyes to the table ahead of him and resumed his former listless air.

At twelve minutes past 2 Justice White took his seat on the bench, and the erier announced the opening of court.

"Czolgosz, stand up," commanded District Attorney Thomas Penney. The assassin arose.

"What is your name?" asked Mr. Penney. "Leon F. Czolgosz."

"How old are you?" "Twenty-eight years."

"Where were you born?" "Detroit."

"Where were you living when arrested?" "Cleveland."

"What is your occupation?" "Iron worker."

"Are you married or single?" "Single."

"Are your father and mother alive?" "My father is alive. My mother is dead."

Czolgosz's replies were so low that he could not be heard five feet away.

"Have you any legal excuse why sentence should not be pronounced against you?"

Nothing to Say.

Czolgosz could not or pretended he could not hear the question put by the clerk. It was repeated to him twice, and then he said something in an inaudible tone. The Judge intervened and explained what was meant by the question.

"First you may claim you are insane. The next is have you good cause to offer against sentence being pronounced against you?" The Judge also stated legal reasons the prisoner might have against sentence being pronounced.

"I have nothing to say about that, Judge," was the reply.

Judge Titus said he thought the prisoner ought to be permitted to make a statement in explanation of his family.

Turning to the prisoner again, Judge Titus held a brief conference. Then counsel for the defendant said: "He says no other person had anything to do with it; that no other person knew of his commission but himself. His father or mother or no one else knew anything about it."

The prisoner closed his lips, stared straight ahead of him and awaited the court's pronouncement of his doom.

The sentence was brief.

The Sentence.

"Czolgosz," said the court, "you have committed a grave crime against the state and our Union in the assassination of our beloved president. After learning all the facts and circumstances in the case twelve good men have pronounced you guilty of murder in the first degree. You say that no other person abetted you in the commission of this terrible act. The penalty is fixed by statute, and it becomes my duty to impose sentence upon you. The sentence of this court is that in the week beginning Oct. 28 at the place designated and in the manner prescribed by law, you suffer punishment of death."

Czolgosz stood erect, looking straight at the Judge. He did not tremble, not a muscle quivered. As soon as the death sentence was finished he took his seat in the same indifferent manner that has characterized him throughout the trial. He was brought to his feet quickly by the officers at twenty minutes past 2. They shackled him and led him away to the fall, while the crowd surged after them.

Sheriff Caldwell and sixteen men left at 10:00 with Czolgosz in a special car for Auburn.

Czolgosz Collapses.

Auburn, N. Y., Sept. 27.—Czolgosz reached the Auburn state prison at 3 o'clock this morning and on entering the penitentiary collapsed completely.

\$1,000,000 Fire In Guayaquil.

Guayaquil, Ecuador, Sept. 27.—A fire here destroyed eleven blocks in the south end of the city. The loss probably will amount to about \$1,000,000.

WAR IN COLOMBIA.

Venezuela Will Announce Formal Declaration Tomorrow.

Port of Spain, Trinidad, Sept. 27.—Advisors received here from Caracas say Venezuela probably will declare war on Colombia on Sept. 28. A financial crisis exists in Venezuela owing to the refusal of the Bank of Venezuela and the Bank of Commerce to comply with President Castro's demand that they subscribe to a forced loan.

Recruiting For Carabobo.

Willemstad, Curacao, Sept. 27.—The Venezuelan gunboat *Restaurador*, formerly the American yacht *Atalanta*, arrived here today and will return to Maracaibo at once.

An emissary to President Castro from an influential Venezuelan official in Maracaibo passed through here. The emissary is charged to persuade President Castro to refrain from taking aggressive action on the frontier, but to hold the troops on the Venezuelan side ready to repel a Colombian advance should any be made. This plan is endorsed strongly by certain conservative Venezuelan officials in Maracaibo and Quito, where hopes are entertained that President Castro will be persuaded to adopt the suggestions made.

It is reported here that Venezuela is recruiting in the state of Carabobo and that the Venezuelan authorities intend sending 3,000 men, with arms and ammunition, to guard the frontier of the Guajira peninsula.

Further details received from a Colombian official regarding the Guajira engagement are to the effect that a battalion of Venezuelan troops forced to fight against their wishes deserted from the Venezuelans to the Colombians in the fight at Ceroron on Sept. 14 and began fighting on the side of the Colombians. The official also says that Colombia had 1,200 men in the Guajira engagements. Reports received here say that 300 Venezuelans and four canons were captured and that 600 were killed or wounded or are missing. It is said that a brother of President Castro was wounded.

LINCOLN'S COFFIN OPENED.

Heavy Lead Covering Chiseled Open With Plumber's Tools.

Springfield, Ill., Sept. 27.—In spite of the protest of his only living child the body of Abraham Lincoln was exposed to light yesterday. In the presence of a small assemblage of men and women the metallic casket that for more than thirty-six years has contained the remains of the president was forced open.

Each of the party present gazed at the features made familiar by plate and print. Then the casket was ressealed and placed in what is intended shall be the final resting place, a bed of iron and masonry fifteen feet below the base of the shaft of the national Lincoln monument.

Just who is responsible for the opening of the casket in spite of the avowed opposition of Robert T. Lincoln is difficult to ascertain. It is generally admitted by those present, however, that the proposition to expose the body met with vigorous protest and that it was only after considerable discussion that this course was resolved upon. Then every one of the assemblage was pledged to secrecy regarding the proceeding.

But those among the party who saw in the desire to open the casket only the morbid curiosity of their neighbors were so shocked by the exposure that they are now openly denouncing the act. The heavy leaden covering of the casket was chiseled open with plumber's tools.

Roosevelt For Mighty Navy.

Washington, Sept. 27.—In his message to congress President Roosevelt will deal especially and at length with the need of increasing our navy. He will urge congress to take this matter up at as early a moment as possible, not to lay it aside until provision has been made for the building of a number of the most improved type of vessels.

This just who is responsible for the opening of the casket in spite of the avowed opposition of Robert T. Lincoln is difficult to ascertain. It is generally admitted by those present, however, that the proposition to expose the body met with vigorous protest and that it was only after considerable discussion that this course was resolved upon. Then every one of the assemblage was pledged to secrecy regarding the proceeding.

But those among the party who saw in the desire to open the casket only the morbid curiosity of their neighbors were so shocked by the exposure that they are now openly denouncing the act. The heavy leaden covering of the casket was chiseled open with plumber's tools.

Another Railroad For Yerkes.

London, Sept. 27.—Mr. Charles T. Yerkes has bought another London railroad, or, rather, he has contracted for 990 years with the Great Northern rail way to take over its suburban business and franchise for the projected underground road to extend from Finsbury park to Holborn, Parliament will be asked to grant a franchise for a link between the two lines.

The other was the call on the president by Colonel George W. Dunn, chairman of the New York Republican state committee, for the purpose of talking over the entire political situation in the Empire State.

President Roosevelt is good at keeping secrets, and the fact that charges had been filed against Mr. Bidwell was not known until last evening, although it is understood they have been in official hands for nearly a week.

Filing of the charges means that a determined effort is to be made to prevent the reappointment of the collector.

The existence of the charges explains the president's position toward the collector—that he would reappoint him unless something appeared to show that some other person ought to be given the very important customs berth.

The other was the call on the president by Colonel George W. Dunn, chairman of the New York Republican state committee, for the purpose of talking over the entire political situation in the Empire State.

President Roosevelt is good at keeping secrets, and the fact that charges had been filed against Mr. Bidwell was not known until last evening, although it is understood they have been in official hands for nearly a week.

Then followed "Lead, Kindly Light."

It is impossible now to ascertain who has brought the charges against the collector or the nature of the complaints.

General Diaz In Panama.

Colon, Sept. 27.—Panama is terribly unsettled owing to apparently well-founded reports brought by incoming steamers and received from other sources which assert that an expedition numbering between 150 and 200 men under General Domingo Diaz, which sailed from Corinto, Nicaragua, two weeks ago, effected a safe landing at a place called Chame, about fifty miles south of Panama. Chame offers splendid natural facilities for resisting attack, and the expedition is said to be well armed and equipped and to be in possession of modern guns.

Kitchener May Quit.

London, Sept. 27.—The Daily News publishes an unconfirmed rumor that Lord Kitchener has resigned the post of commander in chief in South Africa owing to disagreements with Mr. Brodrick, the war secretary.

Secretary Cortelyou at Carton.

Washington, Sept. 27.—Mr. George B. Cortelyou, secretary to the president, has left here for Carton. He will settle the estate and adjust some personal affairs of the late president.

Cortelyou Wedding Nov. 6.

Washington, Sept. 27.—Adjutant General Corliss and Miss Edith Patten will be married on Wednesday, Nov. 6, in the home of the bride. The ceremony will take place at noon. Cardinal Gibbons or a Washington clergyman will officiate.

BRIEF NEWS NOTES.

Charles T. Yerkes has leased another London railway.

Naples dispatches reported Mount Vesuvius again in eruption.

Governor General Wood arrived at Havana from Tampa on the Kanawha.

Antonio Maggio, who is said to have predicted McKinley's murder, was held for trial at Silver City, Tex.

Death of Millionaire Rose

WOMAN'S WORLD.

E OF THE MOST POPULAR WOMEN IN THE PINE TREE STATE.

Learns In a Tank—Women and

Leans—Gowns For the Plaza—A

southern Girl Orator—The Topaz

elgs.

The governor of Maine is always an interesting personality, no matter who may be. He is always a man who is nominated and elected for other in addition to political reasons. But the wife of the governor of Maine is a woman who is not often known outside of her mediate circle. The social functions of the governor of Maine are not numerous.

The wife of the present governor of Maine, Mrs. Hill, is, however, a woman who would grace any circle. She is a type of New England womanhood, very much in Maine is proud of her. The other day there was a great gath-

MRS. HILL.

ng of Maine people at Poland Spring. Governor Hill and his wife were there, the young generation of the old state is also there, but Mrs. Hill, it was marked, was the most striking woman.

In the multitude, this was not alone because she is the wife of the governor of Maine, but because of her splendid manhood. If Mrs. Hill made up her mind that she wanted her husband to go to the United States senate, she could doubtless succeed.—New York World.

She Learns In a Tank.

This summer's girl will know how to swim if one may judge by the number

young women to be found in the

Turkish bath tanks at unnatural

hours in the morning practicing

stroke or sometimes taking les-

sons from an attendant.

Oddly enough, these girls say they

turn more quickly in the tanks than at

regular swimming schools. At the

schools most of the teachers use cork

or trolley bells, and for some rea-

son or other women fail to gain confi-

dence while they have these artificial

props.

"I don't believe in the cork floats,"

said a Turkish bath attendant who

numbers many New York women

among her swimming pupils. "They

ve some aid in acquiring the proper

movements, but they fail to give the

greater confidence in herself at the very

beginning. Once she has learned with

help she must begin and learn all

over again without it.

"The best way is to learn in a tank

before going into deep water at all. The

very first lesson in swimming is to

make the pupil confident. If she strikes

it in tank, she knows that if she

does under she has only to pick herself

again.

"Sometimes I have stretched a rope

all the way across the tank and have

town the learner that it is possible to

get it from the steps by pushing the

ot back against the steps as one

does. Once this has been done suc-

cessfully and the swimmer has caught

the rope at the end of the drive she has

learned an important lesson—that is,

at the water will bear her up if the

ody is properly poised.

"Women learn to swim easily enough,

ut they are slow in acquiring style;

they will not go slowly enough, and

they never, or at least very rarely, un-

derstand the impetus that sends the

ody along through the water. They

spend too much on the hands and legs,

ut style in swimming means much

esides being graceful, for it indicates

ourage, coolness, self confidence and a

thorough enjoyment of the exercise.

"Women soon learn to use their arms

racely, but their leg movements

re wild and terrible. To cure this I

ave often had swimmers hold on to

the side rail of the tank and practice

the leg stroke only. Sometimes I take

the pupil's feet in my hands and move

the limbs automatically in the proper

time, counting for each movement. After

guiding the pupil in this way she

will count as she swims alone and

master the motion.

"The grace of a swimmer largely de-

pends on the power and sweep of her

stroke. The hands pointed directly

head, should be held together while

the swimmer counts one slowly after

ringing the finger tips in touch. Rest-

on the stroke for this one moment

allows the body to drive ahead from

the impetus given by the kick. Most

women part the hands immediately on

ouching them and thus waste force

and retard their progress."—New York

World.

Women and Dreams.

It doesn't seem possible that in this enlightened age superstition could be

ife among the educated, but there are

nevertheless a number of young women

in who converse fluently, it is not

eloquently, in three languages and who

read Spenser and Browning and Emer-

son, but who place a dreambook with

their Bible on the table beside the bed

and consult it in the morning the first

thing.

"With a credulity worthy a negro

lets that clasp the white members

above the elbows.

Woman and Husband.

When the proprietors of drug stores

first began to employ women prescrip-

tion clerks, the men did not propose to

stand this infringement on their terri-

tory if they could help it.

In one case of this kind in New York

the male clerks first demurred and

carried the report of their resolution to

their employer, who had engaged what

they derisively termed the "woman pre-

scription." Ultimately they all refused

to work unless the young woman was

discharged.

The woman in question was young,

courageous and capable. When the proprie-

tor told her, she promptly re-

plied that she hoped to stay if he were

satisfied with her accuracy in filling

prescriptions. She remained. The men,

feeling that they must act up to the

requirements of their joint resolution,

all left. Their places were filled without

the least trouble, and the proprie-

tor found the "woman prescription"

such a valuable thing that he secured

it as his patent right by marrying the

girl. He now has a faithful and com-

petent partner as well as a first class

prescription clerk.—Home Magazine.

About Summer Diet.

A physician who has reduced the sci-

ence of health to a system of diet and

exercise, with abundant bathing, de-

clares that no meats, excepting lamb

and chicken, should be eaten in hot

weather, to which list, however, he

adds fresh fish. Certain it is that much

meat is unnecessary for even laboring

men with the mercury among the nine-

ties. The lazy West Indian negro

grows fat on coconuts and bananas, the

East Indian coolly toils all day long on

his rations of rice. The hardy Arab

conquered the world on diet of dates

and barley bread and ceased to be the

terror of Europe only when he had

such fare too simple for his taste. Ce-

real and milk for breakfast, bread and

eggs with fruit for luncheon, soup and

vegetables, with little or no meat, and a

salad, may be the chief of the sum-

mer diet, in which there is sufficient

nutriment. Oatmeal as a cereal is too

hearty for the blood to be advised. In

fact, heavy workers, such as farmers,

are alone the people for whom a steady

diet of oatmeal is wholesome.

Gowns For the Plaza.

In making a choice of summer mod-

els for plaza gowns one has every

right to lay a claim to the chef d'œuvre

of the couturiere's art. The

freedom of a choice like this means a

great deal to the summer girl. Never

before has summer finery seemed quite

so seductive. Can the athletic girl

forego the temptation and content her

self with a half dozen or more duck

skirts and a score of spick and span

shirts and a score of stockings and span-

SATURDAY, SEPT. 28, 1901.

The snake anarchy will soon be stamped to death beneath the holmained foot of the law.

The close of the Schley court of inquiry will bring forth a great sigh of relief from a patient and long-suffering public.

President Roosevelt is a great pedestrian, certainly. And no man ever walked into the public favor more rapidly than he has done.

The express determination of the mayor of Hoboken to rid his city of the nest of anarchists that have polluted it all to long is certainly praiseworthy.

It is right good news from the little city of Canton that Mrs. McKinley gives no sign of collapse under her great loss, but instead makes reasonable the hope that she may overcome her grief to a degree which shall spare her to an adoring and sympathetic nation for many years yet.

It is characteristic of the spread of our trade that, having sold a great many heating stoves to the Germans, we are now shipping them anthracite coal to burn in these stoves. All we seem to need to introduce our goods and products is an entering wedge. The superiority of our heating stoves being conceded, it was inevitable that the superiority of American anthracite coal as fuel for them must become apparent. The Old World has not been exactly slow to admit the superiority of our anthracite over all other coal. That has been demonstrated by many tests.

A decided contrast to the barbarity of certain Filipino insurgents is presented by the recent revisions, by Gen. Chaffee, of military judgments pronounced in the Philippines. Gen. Chaffee has intervened to save the lives of Filipino insurgent soldiers who were condemned to death for the murder of American soldiers and friendly natives, in cases where it appeared that they were not primarily responsible for the crimes, though he has held the principals in these cases to their full and fatal responsibility. Some of these Filipino murders were of the most shocking barbarity. Gen. Chaffee has shown the utmost leniency that is consistent with justice, and all his decrees reveal a degree of wisdom and clemency which will not surprise those who are acquainted with his record.

wheels of the cars are grinding it out." "I'm still in the dark," put in the Heraclian.

"Not a bit of it," answered Mr. T. "You and I and a few hundred other people know that the plain English for Quo Vadis is 'whither goes that?' though when it first came out I believe a number of people thought it was a cross between a cure for chapped hands and a new complexion wash. Even now I fancy some folks think it is a burning volcano, or one of the pyramids of Egypt. But as I was saying, the translation Quo Vadis—'whither goes that?'—where do you go from here? the question is identical you see and that's the tune that's sung on me without change, and that's what I call being Quo Vadis, and with a shrewd wink the unblushing agent swung out of the hotel.

A TRIP THROUGH CRAWFORD NOTCH TO BARTLETT.

The White Mountains have long been celebrated for their beautiful scenery and natural environments, but in no portion of these large mountains has nature done more towards showing her powers and skill than in the Crawford Notch. This natural grotto is about seven miles in length. It is like a spacious chasm hollowed out from the thickness of the mountain rocks with towering summits and snow-clad peaks rising on each side. About the centre of the passage, between Mt. Webster and Mt. Willey, two of the commanding bluffs which overlook the notch, is a narrow passageway noted as the site of the Old Willey house where the Willey family were killed by a landslide. Further down looms the peak of the mighty Mt. Washington, one of the grandest and most magnificent of America's matchless mountain peaks. The Crawford Notch closes with a narrow passageway through which the railroad runs to Crawford, situated at the top of the hill whose steep acclivity the train has been obliged to advance.

On Monday, Oct. 7th, the Boston & Maine railroad will run an excursion from Massabesic and principal stations on the Portsmouth and Manchester branch including Portsmouth; also from Nashua and Goff Falls at a round trip rate of \$2.00. Returning, train will leave Bartlett, N. H., at 3 p. m.

AT THE NAVY YARD.

Ship house number four will be sold at noon today.

Many of the visiting firemen inspected the navy yard on Friday.

Capt. White of New Castle, janitor in the steam engineering, is on a week's vacation.

The steam heat was started for the first time at the officers quarters on Thursday.

Toilet rooms are being built on the first floor of the steam engineering machine shop.

It is thought that the work on the Raleigh, Detroit and Spanish boats will be pushed by more help.

Carpenters are working on the new band stand which will be almost in the same place as the old one.

Hospital Apprentice Franz of the Naval hospital has been transferred to one of the converted yachts.

Many of the workmen went to take a look at the U. S. S. Marietta on Friday at noon, but were disappointed at not being allowed to get aboard the ship.

The officers quarters will soon be heated by steam to be taken from the new electric light plant. The workmen now have the trenches almost ready for the laying of the pipes.

PROMOTION FOR SPICER.

William F. Spicer has been promoted from major to lieutenant colonel in the United States marine corps. This fortunate officer has just returned from the Philippines. It is expected that he will be ordered to duty at this yard.

New Departure

I have a new stock of
Wall Papers and Paints
Which I can furnish at
Lowest Prices.

Charles E. Walker,
Government St., Kittery, Me.

The larva of the meat fly increase in weight about 200 per cent the first day after they are hatched.

An Insect Shower.
In Szentes, Hungary, a most interesting phenomenon occurred recently. At dusk a black cloud suddenly obscured the sky, and a shower of greenish, opaque insects began to descend, covering the ground to a depth of a foot.

A Bee Test.
Sir John Lubbock kept a queen bee for fifteen years, a test proving her eggs to be just as fertile at that age as they were twelve years before.

AN AUTOMOBILE MOWER.

The Latest Move in the Campaign Against the Horse.

The automobile has been adapted for use in agriculture. A Chicago firm has turned out a mower equipped with ball and roller bearings and propelled by a gasoline motor. The motor, according to The Scientific American, insists of a pair of four cycle gasoline engines of six horse power, mounted tandem on a large pipe six inches in diameter and five feet long.

The rear of this pipe is adapted to be secured to the mower frame the same as an ordinary draft tongue, and the front end is supported by a steering

wheel. The large pipe serves not only as a bed for the motor, but also as a reservoir, in the middle part, for gasoline, and as exhaust chambers at its front and rear ends, one chamber for each cylinder, respectively.

Although the driving devices are designed primarily for a mowing machine, the motor is adapted to a variety of purposes. By simply disengaging the cutting apparatus it may be used as a portable agricultural engine for drawing loads about the farm, grinding feed, pumping water, sawing wood, or any other purpose for which an engine is valuable.

The automobile mower is like the White Mountain, having been designed for a mowing machine, the motor is adapted to a variety of purposes. By simply disengaging the cutting apparatus it may be used as a portable agricultural engine for drawing loads about the farm, grinding feed, pumping water, sawing wood, or any other purpose for which an engine is valuable.

FANCY AND I.

I heard the wind rise, I heard it fall,
Saw the chipmunk scamper on roof and wall;
I heard the sparrow, glad as the day,
Caroling, throwing songs away;

Where light and laughter would ripple and pass,
Saw the cricket jump after his heart in the grass;
Where all day long the clouds—oh! fancy—
Witched the meadow ways and the daisy dances;

Heard the yellow birds flying in rhythmic waves,
Every crest tipped with plaintive staves;
Heard the woodpecker hammer the hemlock bough,
Saw the marmot end at the door of his hole,

Saw the jay awake and the bat asleep,
Saw the moss all still, saw the runcel creep;

Saw the lark day live, saw the brave day die,
Saw the bee go home and the butterfly;

Saw the first wild star wheel into the sky.
So fancy shows to the eyes that close;

The blissful things that nature knows;
So fancy brings to the heart that sings

All-happy, shining, singing things.

Fancy and I, 'twixt these walls alone,
And the world our own.

—John Vance Cheney in Outlook.

MAKING NEWS.

How Arthur Brisbane Once Scored a Big Beat For His Paper.

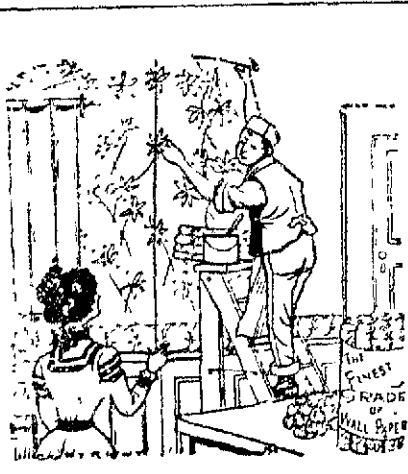

"The layman who is unacquainted with newspaper methods may be interested in knowing just how one goes about making a piece of news," says Allen Sangree in Ainslee's Magazine. "The best illustration of this, perhaps, is Arthur Brisbane's arrangement for John L. Sullivan to box before the Prince of Wales. At this time Mr. Brisbane was London correspondent for the New York Sun. It should be understood that the competition among the London representatives is just as keen as though they were serving their separate papers on Park row, and, though living in an atmosphere of less aggressive journalism, they never for a moment forgot their American education. In this matter Mr. Brisbane was London correspondent for the New York Sun. It should be understood that the competition among the London representatives is just as keen as though they were serving their separate papers on Park row, and, though living in an atmosphere of less aggressive journalism, they never for a moment forgot their American education. In this matter Mr. Brisbane was London correspondent for the New York Sun. It should be understood that the competition among the London representatives is just as keen as though they were serving their separate papers on Park row, and, though living in an atmosphere of less aggressive journalism, they never for a moment forgot their American education. In this matter Mr. Brisbane was London correspondent for the New York Sun. THE HERALD.

SATURDAY, SEPT. 28, 1901.

CITY BRIEFS

Yacht races today.

Who repairs your shoes? John Mott, 34 Congress St.

Today, Saturday, the employees of the Boston and Maine receive their pay.

Walter Woods is to pitch for the Byfields in a game with Rowley this afternoon.

A large number of the visiting firemen attended the theatre on Friday evening.

The police were called to Noble's island on Friday night to arrest a wild drunkard.

WANTED.—A good, hustling, strong boy. Steady employment. Apply at the *Herald* office.

Several well known sports are doing some lively coon hunting by moonlight the present week.

Joseph Quinal was fined \$10 and costs of \$8 16 in police court for drunkenness on Friday evening.

When doctors fail, try Burdock Blood Bitters. Cures dyspepsia, constipation; invigorates the whole system.

Beginning at sundown on Thursday evening, commenced the eight day Hebrew feast of Succoth.

Takes the burn out; heals the wound, cures the pain. Dr. Thomas' Electric Oil, the household remedy.

Now 'tis said that the Marietta will not go out of commission at this yard, but will have twenty-four working days for repairs.

The strong eat well, sleep well, look well. The weak don't. Hood's Sarapilla makes the weak strong.

An informal dance will be given by local society young ladies in Peirce hall this evening in honor of the officers of the U. S. S. Marietta.

It's folly to suffer from that horrible plague of the night, itching piles. Dr. Dow's Ointment cures, quickly and permanently. At any drug store, 50 cents.

There will be a football game at the navy yard at three o'clock this Saturday afternoon. The Marines and the Kittays will line up for the first local game of the season.

The majority of the out of town firemen and the members of the state association passed Friday night in the city and were entertained by the Portsmouth fire fighters.

One of nature's remedies; cannot harm the weakest constitution; never fails to cure summer complaint of young and old. Dr. Fowler's Extract of Wild Strawberry.

The Up to Date waiters are making elaborate preparations for their coming ball and prize cake walk, which will be something more extensive than they have ever before attempted.

The regular meeting of the Portsmouth W. C. T. U. was held at the Y. M. C. rooms on Congress street on Friday afternoon at three o'clock. The business was of a routine character.

Agents are doing a great business in selling the life of President McKinley, 600 pages, 100 illustrations, up to date, at \$1.60, but the Globe Grocery Co. are taking subscriptions of their customers for the same at 75 cents, for one week.

A faithful old horse that has been used by the admirals at the navy yard, was mercifully put to an end on Thursday night, as the animal had passed all usefulness. State Agent Perkins of the anti-cruelty society was called to do the humane act.

It is stated that Ellen C. Abbott of York Village has in her possession an autograph letter written by Frederick the Great, to the Empress of Russia in the year 1799. Experts who have examined it pronounce it genuine and of the greatest historical value. Miss Abbott obtained possession of the letter by a curious circumstance while in Bor-

neo, Germany, five years ago. She values the letter at \$1,000 and cares but little to part with it at that price.

Mr. William J. Kershaw, clarinetist, will teach at Conservatory Hall.

Mrs. Flora F. Spinney has resumed her classes in vocal culture at Conservatory Hall.

WANTED.—A neat, capable woman as nurse. Must have references. Apply at this office.

Mr. C. Eugene Fournier is to be instructor of violin at Portsmouth Conservatory of Music.

Mr. George Lowell Tracy, the well known Boston opera director and composer is visiting friends at Conservatory Hall today.

Mr. Gerald Whitman of the Portsmouth Conservatory of Music will again play as cellist of the Pentucket orchestra of Haverhill, being in this city only to attend his classes in piano and cello at Conservatory Hall;

Francis Stetson, ex-President Cleveland's law partner, will build a \$20,000 cottage at York Harbor next season. It will be located near that of Thomas Neilson Page. Surveys for the grounds have been made by Civil Engineer Rowland Libby of Saaco.

At the Advent Christian church on Hanover street, the pastor will give to morrow at 2:45 p.m. the third in a series of discourses on "The Seven Seals of Revelation." Social service at 10:30 a.m. Evening service at 7:15 p.m. Children's meeting at 6 o'clock. All are invited to these services.

Boston & Maine railroad engineers were at Dover Point this week, surveying for side tracks to lead to the Flake Brick Co.'s plant. Fifteen hundred bricks for the construction of this plant have arrived on the ground, while the necessary lumber has been contracted for. The boilers, engines and machinery for the manufacture of bricks have also been ordered. The work of construction will be begun very soon and pushed to completion. It is now expected that the plant will be ready for operation in the spring.

The thing to do when suspicious persons are in the neighborhood is to tell the officers and have the case looked into. The police are not mind readers and they cannot for a certainty tell that a man is a robber by simply looking at him. Faithful as they may be and alert as one can be expected to be, the officers need to be told of what is going on. Get a description of the man against whom your suspicions are directed. Call up the station by the nearest telephone, or walk to the station yourself, if you can. If people could be relied upon to do this there would be less bold robberies and the robbers would speedily be taken into custody.

The funeral of Mrs. Mary Moran, wife of James Moran, was held at the Church of the Immaculate Conception at eight o'clock this morning. The pastor, the Rev. Fr. Patrick J. Finnegan, officiated. Interment took place in St. Mary's cemetery. The pall bearers were Michael Kelley, Daniel F. Collins, William Cogan and John Jones. The service was largely attended by the many friends of the deceased and the family.

The funeral of Christine E. H. Bettom, child of Mr. and Mrs. Michael Bettom, was held at the home of the parents at two o'clock this afternoon. The Rev. Thomas Whiteside, pastor of the Trinity Methodist church, officiated. The burial was in the family lot in Proprietors' cemetery.

OBSEQUIES.

The funeral of Mrs. Mary Moran, wife of James Moran, was held at the Church of the Immaculate Conception at eight o'clock this morning. The pastor, the Rev. Fr. Patrick J. Finnegan, officiated. Interment took place in St. Mary's cemetery. The pall bearers were Michael Kelley, Daniel F. Collins, William Cogan and John Jones. The service was largely attended by the many friends of the deceased and the family.

The funeral of Christine E. H. Bettom, child of Mr. and Mrs. Michael Bettom, was held at the home of the parents at two o'clock this afternoon. The Rev. Thomas Whiteside, pastor of the Trinity Methodist church, officiated. The burial was in the family lot in Proprietors' cemetery.

REAL ESTATE CONVEYANCES.

Following are among the conveyances of real estate in the county of Rockingham for the week ending Sept. 25, as recorded in the registry of deeds:

Portsmouth—Moses H. Goodrich to Jennie M. Marden, Bristol, and Charles L. Pinkham, lands on Dennett street, \$1; Frank E. Dearborn et al. to Charles L. Pinkham, land and buildings on Maplewood avenue, \$1.

Salem—Addison P. Gould to Susie E. Gould, both of Lawrence, land and buildings, \$1; George H. R. Joyce, Everett, Mass., to Eugene A. Clark, Lowell, land and buildings, \$1.

Seabrook—John D. Locke to Charles S. Dow, land, \$1; Emily W. Locke to Hampton and Amesbury street railway, land, \$1.

Windham—Administrator of estate of William Taylor, Salem, to S. W. Gould & Bros., land, mill, etc., \$800, deeded in 1898.

DR. J. P. TRUE & CO., Auburn, Me.

MCCLOUD PLEADS GUILTY.

The Kittery Point Murderer Arraigned at Alfred.

First Said He Was Not Responsible Then Said Guilty.

Hearing to Establish Degree of Guilt to be Held on Tuesday.

ALFRED, ME., Sept. 28.—Charles Atmon McCLOUD, the Kittery man who murdered Sadie A. Wallron at Kittery Point the first of this month, was brought from the Alfred jail to the court house late yesterday afternoon and arraigned under the indictment, which charges him with murder in the first degree.

Very few were in the court room at the time McCLOUD was brought over for it was past five o'clock. The indictment was read by the clerk of the court. When McCLOUD was asked to plead, he said, "Guilty; but I don't think I was responsible."

The court told McCLOUD that it could not accept a plea of guilty with the qualification he had attached to it, and told him he must either say guilty or not guilty. McCLOUD spoke to his counsel, Fred J. Allen of Sanford, and then said "Guilty."

The court then said that witnesses would be heard to establish the degree of the guilt, and that the hearing could be arranged between the counsel and the county attorney.

The hearing will probably take place on Tuesday of next week. The matter of hearing witnesses to determine the degree of the crime is a matter of formality, and necessary in a capital crime.

NEW BUILDING ENTERPRISES.

Business Projected Throughout New England For the Past Week.

The estimated cost of new building and engineering enterprises projected throughout New England during the past week, as compiled by the F. W. Dodge company, approximates \$2,147,000, as against \$2,712,000 during the corresponding week last year, making a total of \$31,650,000 to date this year against \$65,318,000 for the corresponding period last year.

Contracts have actually been awarded this week for \$1,142,000 worth of work.

Throughout Boston and vicinity the amount of work projected during the week approximates \$1,050,000 making \$53,185,000 to date, and contracts have been awarded on \$274,000 against \$563,000 last week.

About 36 per cent of the work projected in New England for the week is for dwellings, apartments and hotels, while 8 per cent is for mills, factories and other manufacturing buildings.

OBITUARY.

Mrs. James Moran.

Mrs. Mary Moran, wife of James Moran of this city, died in Somerville, Mass., on Thursday. The body was brought to this city on Friday afternoon for funeral services and interment. The body was taken to the home of her son, Henry Moran, at No. 2 McDonough street. The age of the deceased was sixty nine years. She is survived by a husband, five sons and two daughters. The funeral took place this Saturday morning at the Church of the Immaculate Conception.

MARY BUTLER.

Mary Butler, the two months old daughter of Mr. and Mrs. Patrick Butler of the Greenland road, died on Friday. The funeral took place this Saturday afternoon.

MRS. BETTY LOMAS.

Mrs. Betty Lomas of Portsmouth died in New Bedford, Mass., Thursday night, where she was visiting friends, aged seventy-five years. She is survived by three sons, William and James of this city, and Thomas of Dover, and two daughters, Mrs. Watson of Portsmouth and the other a resident of New York city.

DIVORCE FIGURES.

An Average Annual Increase of About Five and a Half Per Cent.

An act of the last legislature required the clerks of court to furnish to the registrar of vital statistics records of all the divorces in the several counties since June, 1858, giving the names and residence of parties, date and place of marriage, sex of libellant and date and cause of divorce. The following is a partial summary of the records for Rockingham county:

Number of divorces from June, 1858, to April term, 1901, both inclusive, 44 years, male libellants, 439; female libellants, 894; total, 1333. The average number per year for the first 10 years, 1858-67, was male libellant, 45; female, 10; total, 14.5. For the last 10 years, 1891-1900, the average per year was male libellant, 13.6; female, 32, total 45.6. The smallest number in any one year was 7, in 1862. The greatest number was 60, in 1895. The average annual increase being in the late years of the period and of female libellants. The number of each cause is as follows:

Male libellants—Abandonment, 226; extreme cruelty, 36; adultery, 160; drunkeness, 12; impotency 2; nullity, 4.
